DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 1-6 are allowed because the prior art does not teach or suggest a method of analyzing the effects of a high frequency transmission system comprising: modeling a high frequency signal source as an ideal voltage source and a resistance and capacitance circuit; modeling bond wire connections within said transmission system using an equivalent resistance, capacitance and inductance circuit; modeling an integrated-circuit package in said transmission system using an equivalent resistance, capacitance and inductance circuit; modeling a package stub in said transmission system as an unterminated transmission line; and selecting a package trace such that the length of said package stub is sufficiently short so that transmission line effects of said package stub occur at a frequency higher than the highest-expected frequency used by said package trace.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
